The Tooth Fairy

In Europe and America when children lose their teeth, a tooth fairy comes to visit them. When children lose their teeth, they don't throw the teeth away. They put the teeth under their pillow at night and wait for the tooth fairy to come. The Tooth Fairy is a small person with wings who comes through the bedroom window while you sleep. She looks like Peter Pan's friend, "Tinker Bell". She takes your tooth and leaves money for you. If you lose one tooth, you will get one quarter. If you lose two teeth, you will get two quarters. In the morning when you wake up, you will find the quarter under your pillow where your tooth used to be. Like Santa Clause, the Tooth Fairy is a magical person that children believe in.
